### Career Objective

I am a passionate backend developer with 1+ years of experience building virtual platforms for organizations at a professional level. My experience with development web application is primarily in Laravel, but I am also comfortable using JS, WordPress with plugin, React.JS, React Native and among others. I am creative and detail-oriented in designing platforms architecture that are functional and user-friendly. I have a strong understanding of the use of relational and non-relational databases. I also value the use of mobile programming to design a well- rounded platform that caters to the unique needs of each customer I serve.

### ■ Expertise:
